Meeting Open Access (OA) and Deposit stipulations: Navigating All Publication Options for University of Manitoba Researchers

This chart maps various publication options to publishers' sharing policies, mostly as the process relates to article publishing. These can conflict with the obligation of researchers' funded by the Tri-Agency to comply with the Tri-Agency Open Access Policy on Publications and the soon-to-be ratified Tri-Agency Research Data Management Policy for data deposit. As represented below, “openness” is a spectrum from fully open (gold) to in-between (green/hybrid) to subscription; a full explanation of this spectrum, see the HowOpenIsIt Guide.

LEGEND

* Meets open requirements, with appropriate version conditions

** Expectation under Data Management policy

--- Significant qualifiers apply; read publication agreement details carefully

Not advisable publishing choice/step
